Furniture Industry

DREISTERN
Forming success. Together.

Behind every **Slide.**

Drawers that slide smoothly and quietly.
Slides and trim in a contemporary design,
made specifically for this purpose.

DREISTERN
Forming success. Together.

Quieter operation with less material – that's your equation. We'll solve it together with you, from the first sketch to mass production: up to 6% less material consumption, complex cross-sections, short payback periods.

What's changing right now
Design cycles are getting shorter and demands on feel and durability are rising. Whoever can bring a new profile into production in days rather than weeks will win the next order.

Profiles from our production lines
Slide-out rails, drawer sides, and back panels.

Why DREISTERN
- Developers who work with you to design, not just deliver
- Coil change – including welding – in about three minutes
- Complex profile cross-sections with all punching features fully optimized for series production
- Short payback periods

Who works with us
Leading furniture hardware manufacturers. We collaborate with many of them to develop new products together from the very beginning.
