

INDUSTRY NEWS: STORAGE / LOGISTICS

Absolute Precision

For decades Dreistern has been recognized in the roll forming industry for the uncompromising **quality** and outstanding **productivity** of Dreistern machines.

Unrivaled **low scrap rates** ensure significantly **lower material consumption** and thus **lower costs**.

DREISTERN-Production Systems for Shelf and Logistics Systems

Manufacturers of shelving know it well: **large quantities of scrap** are **not uncommon** during the **production of profiles** for shelving systems.

As **small lot sizes** are becoming **more and more important** nowadays, it is important to ensure that **more good parts** are produced **than scrap** is generated.

A **roll forming machine capable of changing over from good part to good part** in less than **eleven minutes** while creating only **one meter profile** for the **scrap bin** pays off quickly!

An **investment in a Dreistern roll forming system** is amortized verifiably within a short time and assures **high efficiency** and high **investment security**.

Dreistern supplies **turnkey solutions** starting from coil processing through **profile forming & punching** to stacking of finished products.

INDUSTRY NEWS: STORAGE / LOGISTICS

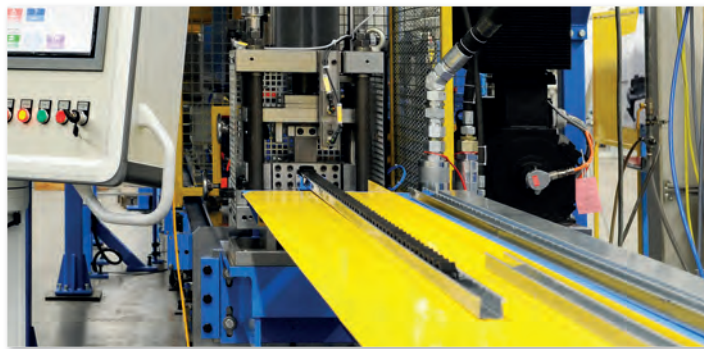

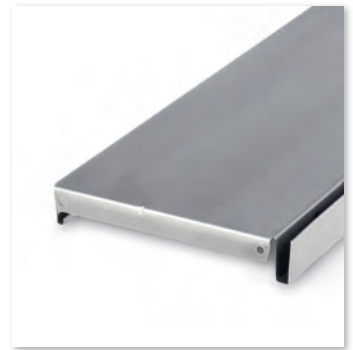

Benefits / Investment Security

- Secondary operations, e.g. for automated welding of brackets
- Realization of complex, needs-based production systems, e.g. carton wheel flow track profiles for the logistics industry

Our competence / your advantage

- more than 70 years Experience
- More than 1800 roll forming systems installed
- More than 8000 realized roll forming tools and profiles
- Test center and prototype production
- General contractor
- Experience in large projects
- Well-known cooperation partner

- Minimization of scrap during a product change
- Economical production of small lot sizes through short change-over times
- Reproducibility
- Constant profile quality within required tolerances
- High output rates
- Long-lasting and process-safe systems
- Systematic prevention of errors
- Help and advice for development of new improved profiles
- Easy operation
- Worldwide Dreistern Services

The DREISTERN GmbH & Co. KG is the preferred innovation partner worldwide for state-of-the-art profiling technology. Leading manufacturers rely on Dreistern technology. The brand's three stars stand for innovative technology, partnership-based relations and mutual success. Dreistern is a family owned business with about 230 employees, the experience of almost 70 years company history and over 1800 delivered systems worldwide.

Over the years, Dreistern has developed into a technology leader and reliable manufacturer of roll forming systems. The core competencies of the company are roll forming and other integrated processes, such as welding or punching. Dreistern is a partner, consultant and supplier for the entire profile manufacturing process - from new product development to successfully produced parts.
